EDUCATION TECHNOLOGY, DATA & BUSINESS SYSTEMS LEADER

Education technology and business systems professional with experience across K-12 instruction, campus and district data systems, HR and finance platforms, and custom software development. Designs and builds applications, automation, and reporting systems that improve daily operations for schools and businesses. Combines a foundation in accounting and enterprise systems with hands-on development to turn inefficient processes into reliable, working tools.

CORE EXPERTISE

Data & Reporting: Student information systems (Skyward, eSchoolPlus), EOC/assessment data analysis, Looker Studio, Power BI, SQL, PEIMS/TSDS compliance reporting

Application Development & Automation: Google Apps Script, JavaScript, custom web applications, workflow automation, API integrations

Business & Enterprise Systems: Munis, SAP ERP & Financials, HR and finance reporting, multi-entity accounting

Instruction & Training: CTE instruction, industry certification preparation, staff and teacher training, LMS administration

PROFESSIONAL EXPERIENCE

Lewisville High School Killough — Lewisville ISD, Lewisville, TX

Jul 2024 - Present

Educator | Campus Skyward Coordinator | Gradebook Mentor | Campus Webmaster & Social Media Lead (additional responsibilities)

Teach CTE computer science and digital media courses while serving as the campus resource for data systems, applications, and web presence. Support a staff of approximately 70 with Skyward and gradebook processes, mentor new teachers on curriculum and LMS use, and manage the campus website and social media at the principal's request.

- Achieved a 91.46% combined student pass rate on Adobe Illustrator and Adobe Express certification exams, with many students earning both certifications.
- Built an EOC data tracker supporting the campus Targeted Improvement Plan (TIP) that aggregates results by student and standard; the work earned expanded administrative data access and led to being placed in charge of EOC data support for all three Lewisville High School triad campuses (Main, Harmon, Killough).
- Replaced scattered links, documents, and logins with a single faculty resource hub (lhskillough.github.io/Faculty) now used by roughly 70 campus staff as their daily starting point.
- Eliminated manual, paper-and-spreadsheet tracking for after-school detentions, tutoring, and loss-of-credit time by building custom applications with automated workflows and parent notifications, and built the campus social media submission and posting app.
- Increased grading efficiency by 25% through Canvas API automation.

NexaFlow Digital, Frisco, TX

2025 - Present

Founder & CEO

Own and operate a custom software and automation company serving businesses and school districts in the Dallas-Fort Worth area (nexaflowdigital.com), directing client strategy, scoping, and delivery.

- Saved Irving ISD approximately \$19,000 by building a custom inventory tracking system to replace Eduthings, which the district found too complex for its needs.
- Built a social media approval and publishing platform that lets client organizations drop per-seat scheduling subscriptions, cutting their recurring software costs.
- Replaced manual schedule cross-referencing for a youth baseball association with a custom web app that turns raw multi-field game data into a filterable schedule for coaches, parents, and staff.
- Delivered custom applications, dashboards, automation, and event technology across education, youth sports, and small business clients, replacing off-the-shelf tools and manual processes that did not fit.

Gilbreath-Reed Career and Technical Center — Garland ISD, Garland, TX

Jul 2023 - Jul 2024

Educator / TATF Liaison (District Leadership)

Taught dual credit Accounting and Finance while supporting districtwide SIS work and staff training. Prepared students for Microsoft Excel Expert certification and NOCTI Accounting exams; based on student results, was placed in charge of training other teachers to prepare their students for the same exams.

- Reduced SIS errors and improved attendance tracking by 40% through a custom database solution.
- Increased student data processing efficiency by 30% through automated workflows.
- Led district training on SIS tools and data practices for cross-campus staff and developed reusable SIS support materials that accelerated onboarding and improved data quality.
- Earned Outstanding Educator award; ranked #2 in Texas at the 2024 Microsoft Office Specialist U.S. Championship.

Irving Independent School District, Irving, TX*Sep 2020 - Jul 2023***Analyst & Programmer***May 2022 - Jul 2023*

Promoted from campus educator into district administration as Business Application Analyst; within months the role advanced to Analyst & Programmer. Supported district applications, reporting, integrations, user access, and system processes across the Performance Outcomes and Data department and IT, working closely with the superintendent and HR leadership.

- Automated the district's annual salary process, reducing a multi-week manual effort to a few days and significantly cutting the errors that occurred under the previous process.
- Selected to work alongside the superintendent's leadership cabinet on a major district data-integration initiative.
- Automated HR and finance reporting tasks, reducing turnaround time by 35%, and replaced manual entry with custom SQL-based reports, cutting errors and effort by 50%.
- Expanded the role beyond reporting into IT operations, taking ownership of district-wide user access, account provisioning, and server administration for core platforms including Munis, eSchoolPlus, and Cognos.
- Resolved data discrepancies affecting PEIMS and TSDS submissions, ensuring 100% on-time compliance, and standardized executive reporting templates, saving 10+ hours per month.

Educator — Irving High School*Sep 2020 - May 2022*

Taught CTE business and technology courses and supported campus leadership. Built classroom systems for grading, attendance, and certification tracking, and advised DECA and National Technical Honor Society.

- Achieved a 90% industry certification pass rate across all courses.
- Automated certification uploads, reducing manual entry by 80%.
- Built a scannable attendance system, increasing accuracy and cutting administrative time by 50%.
- Built tools that improved CCMR data accuracy and reduced manual reporting.

Fleur De Lis Energy, LLC, Irving, TX*Feb 2020 - Sep 2020***Property Accountant & SAP Systems Administrator**

Managed SAP financial systems supporting revenue accounting, asset integration, and data governance for more than 20,000 ownership records.

- Integrated a \$1B asset acquisition into SAP within 90 days with zero disruption to financial operations.
- Automated internal reporting, improving efficiency by 40% and reducing manual errors by 20%; cut the monthly close cycle by 25%.
- Developed an ACH/W9 tracking system in SAP, saving \$100K+ annually in labor costs.

Maverick Fitness, Frisco, TX*Mar 2018 - Feb 2020***Staff Accountant**

Managed payroll, GL reconciliation, and vendor payments during regional expansion of Orangetheory Fitness studios, configuring financial systems for multi-entity operations.

- Integrated 30+ new studio entities into accounting systems, enabling centralized reporting and eliminating reconciliation delays.
- Automated journal entries and AP processes, cutting monthly processing time by 40% and reducing posting errors by 60%; accelerated the close cycle by 3 days.
